Niadul Islam Munna

FRONTEND DEVELOPER | React · Next.js · TypeScript

Bangladesh · niadulislammunna@gmail.com · github.com/niadul-munna

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building and maintaining SaaS and video infrastructure products. Focused on React, Next.js, TypeScript, and reliable, accessible interfaces; experienced in complex application state, API integration, performance, technical SEO, authentication workflows, and production troubleshooting.

PROFESSIONAL EXPERIENCE

Tenbyte Cloud | Frontend Developer

Jul 2025 – Present | Joined as Junior Frontend Developer; promoted in 2026

- Develop product interfaces and workflows for Vidinfra and Tenbyte CDN, including video library management, search, filtering, analytics surfaces, and playback experiences.
- Improve frontend data handling and navigation using React, TanStack Query, typed API integration, and targeted state-management patterns.
- Contribute to session reliability and account flows, including token refresh coordination and cross-tab authentication synchronization.
- Build and maintain the Next.js / Payload CMS corporate site, with work across multilingual SEO, structured data, server rendering, caching, and asset delivery.
- Debug production issues spanning frontend behavior, Cloudflare caching, Nginx, PM2, object storage, and Linux deployments; collaborate across product and backend teams.

SELECTED ENGINEERING WORK

Vidinfra — Video Infrastructure SaaS

Video library, navigation, search/filter experiences, playback controls, and asynchronous UI reliability; coordinated frontend functionality with service APIs.

Tenbyte Website — Next.js / Payload CMS

Production website with content management, multilingual SEO, responsive UI, caching fixes, and Cloudflare R2 media migration work.

Tenbyte CDN — Management Console

Contributed to product UI for CDN operations, including analytics views, media workflows, library search, and filtering.

TECHNICAL SKILLS

Frontend JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, shadcn/ui

Application TanStack Query, TanStack Router / Start, Zustand, React Hook Form, Zod, REST APIs

Platform & CMS Payload CMS, Cloudflare, CDN concepts, S3-compatible storage, SEO, Core Web Vitals

Backend & DevOps Node.js, Go (working exposure), PostgreSQL, MongoDB, Linux, Nginx, PM2

Workflow Git, GitHub, pull requests, code review, cross-functional collaboration

ADDITIONAL INFORMATION

Open to frontend and product engineering roles. Portfolio: in progress.
